SAFETY and GENERAL INFORMATION

Save these instructions. For your safety *read, understand, and follow* the information provided with and on this device before using. The owner and operator of this equipment shall have an understanding of it and safe operating procedures before attempting to use. The owner and operator shall be aware that use of this product requires special skills and knowledge pertaining to bonding and grounding of personnel and components. Instructions and safety information shall be conveyed in the operator's native language before use of this product is authorized. If any doubt exists as to the safe and proper use of this device, remove from service immediately.

Inspect before each use. Do not use if broken, bent, cracked, or damaged parts (including labels) are noted. Any ramp that appears damaged in any way, operates abnormally or is missing parts, shall be removed from service immediately. If you suspect that the ramp was subjected to a shock load (a load dropped suddenly, unexpectedly upon it), immediately discontinue use until the ramp has been checked by a factory authorized service center (contact distributor or manufacturer for list of authorized service centers). It is recommended that an annual inspection be done by qualified personnel. Labels and owner's manuals are available from manufacturer.

INSTALLATION (refer Figure 1 thru 5)

Note: Below instruction is illustrating the use of fuel tank adapter conjunction with Model 41000 and 41001.

Estimated Time: 30 minutes

Tools required: Drill, $\frac{7}{16}$ " drill bit, 17mm & 19mm wrenches.

1. Remove saddle from the transmission jack.
2. Drill two $\frac{7}{16}$ " size holes on the saddle. Ensure the holes are $9\frac{1}{2}$ " apart and, should be located equally away from the saddle edges about 1" (Refer figures 2 & 3 for location of holes).

Note: The integrity of your transmission jack should not be affected by these two holes as long as the instructions are followed. Omega will warrant its transmission jack original warranty for this specific fuel tank adapter installation.

3. Secure the fuel tank adapter to the saddle with two $\frac{3}{8}$ "-24x1 $\frac{1}{2}$ " bolts, flat washers, lock washers and nuts provided (Figure 4).

(Refer to Figure 5 for below procedures)

4. Slide support stand (1) over one end of the two arms (2). Repeat procedure on other end of same arm; Slide support stand (3) over one end of the other arm. Repeat procedure on other end of same arm.
5. Secure each support stand by inserting snap pin (4) through the aligned holes on arm, snapping the latch over the end of pin as shown.
6. Insert the $\frac{3}{8}$ "-16 x 2 $\frac{1}{2}$ " Bolt (5) through the last set of holes in arm and secure in place with washers, lockwasher and nut provided. Repeat for other three sides.
7. Secure both bonding cables (6) to the top side of frame base with $\frac{1}{4}$ "-20x1" bolt and nut provided.

Note: Remove paint from top and bottom of plate around the $\frac{1}{4}$ " diameter hole.

8. Bolt safety nylon strap (7) to support stand (3). Secure with $\frac{1}{2}$ "-13x1" bolt, washer, lockwasher and nut provided. Repeat procedure on other support stand.
9. The assembly is now ready to use.

OPERATION

Removal of Fuel Tank (Refer to Figure 6)

1. Read and follow the fuel tank removal/installation procedures as stated in the vehicle service manual.
2. Drain the existing fuel into an approved and grounded fuel storage tank.
3. Raise the transmission jack to directly underneath the designated fuel tank, refer to your transmission jack owner/operator's manual for instructions on how to raise and lower the transmission jack.
4. Clip one bonding cable to the fuel tank.
5. Clip the other bonding cable to the transmission jack.
6. Ground the transmission jack to earth.

Operator must be bonded to both the jack and tank! If unsure how to provide proper bonding of personnel and equipment **STOP, discontinue use, and seek the advice of qualified personnel.**

7. Center the fuel tank on all four of the Fuel Tank Adapter padded supports. For adjustment,:
 - a. Open the latch of the safety snap pin and remove.
 - b. Slide the support stand to the desired location.
 - c. Re-insert safety snap pins through the holes in both the support stand and arm. Close the latch of snap pin.
 - d. Adjust the opposite support stand to match the previously repositioned support stand.
 - e. Ascertain that the load is centered with respect to the transmission jack.
8. Place the safety nylon straps around the fuel tank, and hook them to the holes on the on support pads (refer to Figure 6 and Figure 5 *side view*).
9. Securely tighten using the ratchet.

Note: To loosen the strap, pull the safety latch on the ratchet downward and rotate handle 180 degrees. When the strap has been fully opened, the strap may be pulled through the ratchet to take up excess slack.

10. Ascertain that the hooks stay in place while tightening with the ratchet.
11. Remove fuel tank according to the vehicle service manual.
12. Lower the transmission jack to its lowest position before transporting the fuel tank.
